PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 8 years of experience building web applications and APIs with Java and .NET, with React and Angular frontends in TypeScript. I have extensive experience in the retail sector and have also worked on financial and industrial projects. I have 4 years of experience with Oracle and have always worked in agile Scrum teams.

Experience with microservices, Clean Architecture and design patterns, and REST/SOAP API integration. I have deployed to Azure with CI/CD pipelines in Azure DevOps, worked with EKS, Lambda and CloudWatch on AWS, and used Pub/Sub and Cloud Storage on GCP for event handling and storage. I apply Clean Code and SOLID.

TECHNICAL SKILLS

Backend Java	Java 11 and 21, Spring Boot, Spring Data JPA, JDBC, JSP, REST APIs, Microservices
Backend .NET	C#, .NET 5/6/8/9, .NET Framework, ASP.NET MVC, Entity Framework, CQRS
Frontend	React, Angular, TypeScript, JavaScript, HTML5, CSS3, Redux, Zustand, Material UI
Databases	SQL Server, Oracle, Azure SQL, MySQL, PostgreSQL
Cloud & DevOps	GCP (Pub/Sub, topics, Cloud Storage), AWS (EKS, Lambda, CloudWatch, API Gateway), Azure (DevOps, Functions, Blob Storage, AKS), Docker, Kubernetes, ELK (Kibana), Jenkins, Git/GitFlow
Quality	JUnit, Mockito, xUnit with Moq, SonarQube
Messaging	RabbitMQ, Apache Kafka, Kong API Gateway
Other technologies	Kotlin, Swift, Node.js, Python
Methodologies	Scrum, Kanban
Languages	Spanish (native), English (A2)
AI Tools	Claude and Cursor

PROFESSIONAL EXPERIENCE

TOPStrategic · *Freelance · Retail Sector: Oechsle and Promart Homecenter* **Oct 2023 – Jun 2026**
Senior Full Stack Engineer

- Built new projects from start to finish: REST services in Java with Spring Boot and JPA on Oracle, React frontends and deployment on GCP.
- Maintained the legacy .NET 5 and 6 systems for Finance, the SKU price management system and operations management, including their services and jobs.
- Implemented publishing of product events with SKU, price and promotions to GCP Pub/Sub topics; the logistics system consumes them and loads them into CT3 on Oracle.
- Migrated the Tax Management System (SGT) from .NET Framework to React and Java 21 with Spring Boot. It now responds faster and its APIs are ready to be reused by other systems.
- Cut the Finance sales reconciliation batch from 2-4 hours to 6-10 minutes, about one million records, by processing it in parallel batches with CompletableFuture and loading the codes into memory.
- Restructured the React frontend with validations and per-record tracing. Finance used to open 3 to 4 tickets a day for wrong codes and calculations, and up to 14 at month-end close; those tickets dropped noticeably.

EVOL – Centro S.A. (Grupo Gloria) · *Agro-industry and Food Sector* **Jan 2024 – Jun 2025**
Senior Java Software Engineer

- Built REST APIs in Java 11 with Spring Boot for the packaging monitoring system of Gloria's plants, deployed on AWS EKS.
- Built the dashboard that shows each line's packaging in real time, fed by APIs connected to the plant PLCs, and monitored the services with ELK and Kibana.
- Integrated BCP, Interbank and Scotiabank into the group's Host to Host system, which handles bulk payroll and supplier payments: batches are generated in SAP and sent to each bank through SOAP services.
- Migrated the payments platform from Windows Forms to a React and .NET web app. With bulk selection and permission management, Finance went from about 30 minutes to a few minutes per payment run.
- Maintained and refactored the Finance system in .NET 6 and .NET Framework with Clean Architecture and CQRS, along with its PL/SQL packages.
- Worked on the "Gloriosa" promotion, broadcast nationwide, with AWS Lambda functions and Python scripts.

ADDITIONAL EXPERIENCE

- **Digitalia Tec | Senior Java Backend Developer (Freelance) · Feb 2023 – Nov 2023:** REST APIs in Java with Spring Boot for the Accounting area of Juntoz.com and, in React, maintenance of the web application and new modules integrated with those APIs, with CI/CD on Azure DevOps.
- **Casino Atlantic City & Sport | Java Backend Engineer · Jul 2022 – Dec 2022:** REST APIs in Java with Spring Boot and React frontend, the "Finanzas Atlantic" app with ETL processes from SAP, SQL Server and Oracle, an API Gateway with Kong Enterprise, and leading a team of 4.
- **NTT Data Peru | Fullstack Developer .NET · Oct 2021 – Jul 2022:** Built the CVT application in ASP.NET MVC for BCP's ARPAY tribe, integrated with Oracle and with CI/CD on Jenkins; also supported the tribe's teams.
- **Experis | Fullstack .NET & Angular · Jun 2021 – Sep 2021:** Maintenance of Angular 11 and .NET Core/Entity Framework applications for Ferreyros business processes, with continuous delivery on Azure DevOps.
- **Xternal Technological | .NET, Angular, Java, Kotlin · Oct 2020 – Jun 2021:** Led and built the Calidda GNV and Data Update apps; mobile apps in Kotlin/Swift.
- **Sigcomt | Backend Developer Java · Oracle · Feb 2020 – Jun 2020:** Built new modules (credit evaluation, card issuance, loan approval) and SOAP/REST services for Compartamos Financiera.
- **Everis Peru | Junior Software Developer .NET · Dec 2017 – Dec 2019:** Development and support with ASP.NET Web Forms, Xamarin and Telerik components for BBVA, Entel and Pacífico.

EDUCATION & CERTIFICATIONS

Systems Engineering, Universidad Peruana de Ciencias Aplicadas (UPC), EPE Program

- AI with GitHub Copilot for Java & Spring Boot Developers, Udemy (2026)
- Starting with Quarkus Reactive, Udemy (2026)
- Software Architecture and Design of Modern Large Scale Systems, Udemy (2026)
- SOLID Principles: Software Architecture and Design, Udemy (2026)
- Clean Architecture for Beginners, Udemy (2026)
- Azure Serverless Functions and Logic Apps, Udemy (2026)
- Microsoft Azure AI Fundamentals AI-900 Complete Course, Udemy (2026)
- Azure AI Studio, Udemy (2026)
- Terraform Code Infrastructure, Udemy (2026)
